📍 Madrid, Spain · Remote

Creative director and digital product architect with **25+ years** of experience. Since 2012 I have led **Help Estudio**, balancing two streams of work: producing high-performance digital campaigns for **top-tier agencies — Havas, Dentsu, Wunderman** — and building **my own SaaS products** from scratch with **Next.js, TypeScript and AI**. I bring art direction, product and engineering together in a single flow, from concept to launch.

■ EXPERIENCE

Founder, Creative Director & Product Architect · Help Estudio

Jan 2012 — Present

Product & digital production studio · Madrid & Remote · 14+ years

- ♦ Founder and end-to-end owner of the studio: **strategy, creative direction, UX/UI design and product engineering** in a single flow, with no middlemen.
- ♦ High-performance display campaign production as an embedded resource for Tier-1 agencies (Havas, Dentsu, Wunderman, Wink, Bámbu, Ymedia): **HTML5, Rich Media, VPAID and IAB** for brands such as Citroën, Movistar, Sanitas, Mango and BMW, delivered pixel-perfect under demanding deadlines.
- ♦ Design and development of **my own SaaS products** from scratch with **Next.js, TypeScript and AI**, from concept and UX/UI design through to engineering and launch.
- ♦ Native integration of **generative AI and automation** (chained agents, asset generation, prototyping) to multiply the output of a small team.

■ OWN PRODUCTS · Help Estudio Lab

Next3Hours next3hours.com

White-label AI concierge for boutique hotels: six chained agents craft a bespoke afternoon — real venues, timed routes and rewards — in the hotel's own editorial voice. Live in Madrid.

Smashzone smashzone.app

Play padel, earn real rewards. Validates every match with court geolocation and health data, rewarding each verified game with tokens. Season 0 live, iOS and Android.

Motorland motorland.io

Endless-circuit cyberpunk racing game: 4 difficulty levels, 4 unique ships and procedurally generated tracks.

Cartle cartle.es

The daily menu, published to social in seconds, plus a QR code and the restaurant's own website.
